

SAHIL PATEL

PROGRAMMER ANALYST

437-662-9819 | sahilhp318@gmail.com | [Personal Portfolio](#) | [LinkedIn](#) | [GitHub](#)

TECHNICAL SKILLS

- Programming & Scripting:**
Python, SQL, C++, JavaScript, VBA (MS Access, Excel, Word)
- Databases & Data Tools:**
MS Access, Azure SQL, PostgreSQL, MySQL, MongoDB, Database Design, Query Optimization
- Microsoft & Enterprise Tools:**
MS Word, MS Excel, MS Access, PowerPoint, SharePoint, Visual Studio, Git/GitHub
- Web & Application Development:**
HTML5, CSS3, REST APIs, Application Enhancement, User Interface Design
- Documentation & Analysis:**
Technical Writing, User Documentation, Application Support Guides, Requirements Analysis
- Operating Environments:**
Windows XP / 7 / 10 / Microsoft 365

EDUCATION

- Advanced Diploma, Computer Programming/Analysis**
Seneca Polytechnic College, Toronto, ON

May 2024- Present

 - Academic Highlights:** Achieved a GPA of **3.8**, consistently recognized for academic excellence
 - Key Courses:** Web Development, Object-Oriented Programming (C++), Data Structures, Database Systems, System Analysis
- Bachelor of Engineering -Computer Science and Engineering (Data Science)**
Vishwakarma Government Engineering College, Ahmedabad, INDIA

May 2022- April 2024

 - Academic Highlights:** Achieved a CGPA of 9.18, consistently recognized on the Dean’s List for academic excellence
 - Key Courses:** Data Structures & Algorithms · Database Management Systems · Machine Learning · Data Mining · Big Data Analytics · Statistical Methods · Artificial Intelligence · Python & R Programming · Distributed Systems · Data Visualization

PROFESSIONAL EXPERIENCE

- Information Technology Systems Technologist [Co-op]**
Seneca Polytechnic

Sept 2025 - Dec 2025

 - Reviewed and analyzed **existing business applications and system data** to identify gaps, inefficiencies, and improvement opportunities.
 - Designed and enhanced **database-driven applications**, integrating **MS Access-style relational structures** and user-focused interfaces to improve data accuracy by **15%**.
 - Developed **Python-based utilities** to preprocess data and extract indicators used for internal monitoring and reporting.
 - Performed **testing, debugging, and refinement** of applications, reducing reported issues by **20%**.
 - Authored **technical documentation, user guides, and support materials** to facilitate future maintenance and development.
 - Validated fixes and conducted regression checks to ensure system stability in a **Windows 365 environment**.
 - Collaborated with IT and technical stakeholders to present findings and support application reliability.
- ITS & Technology Support (Student-Facing) – Freelance / Academic**
Technical Support & Client Assistance

Aug 2024 - Present

 - Designed and enhanced **database-driven applications**, integrating **MS Access-style relational structures** and user-focused interfaces to improve data accuracy by **15%**.
 - Authored **technical documentation, user guides, and support materials** to enable long-term system maintenance and future development.
 - Performed **testing, debugging, and refinement** of applications, reducing client-reported issues by **20%**.
 - Optimized **data processing workflows through** automation and scripting, lowering operational effort by **15%**.
 - Developed small-scale applications involving **database integration and UI improvements**, aligning with enterprise application standards.
- Vice-President – Seneca Disruptive Technologies Club | Volunteer**
Seneca Polytechnic

Sept 2024 - Present

 - Led planning and execution of **technology-focused workshops and projects**, ensuring clear documentation and process consistency.
 - Coordinated project sprints and timelines, reinforcing **independent work discipline and team collaboration**.
 - Created dashboards and reports to track event metrics and participation data.
- Peer Mentor (Volunteer)**
Seneca Polytechnic

Sept 2025 - Present

 - Assisted **students with identifying secure configurations, understanding account permissions, and interpreting platform logs**.
 - Communicated technical concepts **clearly, improving cybersecurity awareness for first-year learners**.
 - Managed multiple **high-priority student cases simultaneously**, demonstrating strong problem-solving and organization.

PROJECTS

Secure Authentication System – Python, SQL ([GitHub](#))

Designed and implemented a secure login and registration system using salted and hashed credentials (PBKDF2, SHA-256) with CSV and MySQL backends. Applied validation, session logic, and structured error handling to support secure user authentication and maintain data integrity.

Library Management System – C++ ([GitHub](#))

Built a console-based application to manage books, lending, due dates, and inventory using object-oriented design and file I/O. Implemented validation and error handling, improving record accuracy and system reliability.

E-Commerce Data Analysis – SQL ([GitHub](#))

Designed database schemas and wrote optimized SQL queries to analyze sales and customer trends. Generated KPI reports that improved data-driven decision-making and reporting efficiency.

CERTIFICATIONS

- IT Help Desk for Beginners – LinkedIn Learning (2025)
- Azure SQL – Microsoft (2025)
- JavaScript Fundamentals – GreatStack (2025)
- Full-Stack React E-Commerce – GreatStack (2025)
- Google Cloud – Intro to Generative AI (2025)
